WELCOME

Date: 4/06/2021

Agenda

- Decorum of Online classes
- Assignments and Internal Assessments
- Assessment and Evaluation system
- Educloud App and updates
- Screen time, navigating the new realities of online learning.
- Events

Decorum of Online classes

- Punctuality is especially important for online learning
- The students are expected to be attentive in class and participate in the class activities.
- Provide a dedicated place for the child to attend to his/her online classes without any disturbance or any distractions.
- It is required that the webcam is operational and the student is visible on camera during assessments.
- Students should keep up with all assignments.

Assignments and Internal Assessments

* Students will be given class as well as home assignments from time to time for which they may require to use web sources apart from their textbooks.

* Students should work independently and submit work on time.

* Grade wise individual folders on Google drive will allow students to upload their assignments, tests and tasks which will also allow students to compile their digital portfolio.

* As per the new circular by CBSE on Art Integration - Every student needs to do one Art Integrated Project per subject. Students are expected to work on a project as assigned by the teacher and integrate any form of Visual or Performing Art in the subject.

- teachers will also be conducting Art/subject Integrated Activities as part of Subject Enrichment Activity and students will be marked on the same.

- Besides Art Integration Project , Grade 9 and 10th students are expected to complete EBSB [Ek Bharat Shreshta Bharat] and SEWA projects

- Ek Bharat Shreshtha Bharat" project was announced by Hon'ble Prime Minister on 31st October, 2015 This project allows students to explore and experience the cultural diversity of States/UTs while realising that India is one.

- SEWA [Social Empowerment through Work Education and Action] is a program by CBSE that aims to focus on the mental, emotional and social health of a student. SEWA activities comprises raising community awareness regarding health, sanitation, civic habits and environment, unpaid teaching and assistance in teaching, volunteering in nursing homes, orphanages, public events and assistance, care for senior citizens of our community, environmental activities like cleanups, recycling, wildlife preservation societies, partaking in health, wellness and sanitation camps, participate in aiding fund raisers and any trivial act for the well being of our society.

- Teachers will conduct multiple assessments during the class. It is expected that students do not miss any formative assessments conducted.

- The assessments can be in the form of Quizzes, MCQ, One Mark Questions, Case study based questions, student presentations etc. all conducted during the class time.

- In case a student is not able to appear for any particular assessment due to medical reason, the concerned teacher should be informed prior or on the same day. A medical certificate should be sent to the teacher

Assessment and Evaluation system

- Since the emphasis is more on competency-based learning as opposed to traditional rote learning, the assessments will be devised on higher-order thinking skills of creativity and critical thinking and not merely understanding and knowledge.

- All assessments are designed to suit and facilitate the online teaching learning process.

- Grade X will be appearing for their 1st periodical test from 21st June 2021

Educloud App and updates

- School Circulars are regularly uploaded on educloud app to inform the parents about the school events.
- Parents are duly notified through email in case the student remains absent from an online class.
- If students/parents face any problem with Educloud App they must contact

  Nivedita on 9922970549 or

  Manasi on 9420357122 on the same day.
- If any change in registered phone number or address it should be informed to school to avoid any inconvenience.

Screen time and online learning

- Consider limiting your children's cell phones and tablets until their schoolwork is done satisfactorily.
- In this new learning environment, you can help by monitoring your children's levels of interest and engagement in adapting to their new schedule and at-home materials. The simplest way to do this? Observation.
- Make sure that your children take plenty of breaks in order to get physical activity and time away from screen.
- As much as possible, parents should encourage print and book reading. Have discussions with your children about what they are doing, and also encourage creative writing.
- Help your ward to prioritize and learn to create goals, tasks, and deadlines, just like adults do when they go to work. Tasks that may not have been difficult for them while attending school in person can become more challenging when learning from home, so it's important to reinforce boundaries and offer incentives at times for healthy behaviors.

School Events in June

- World Day Against Child Labour
- World ocean day
- World Environment Day
- Grade X Periodic test -1
- Council body elections
- Medical form online submission

“It’s only after you’ve stepped outside your comfort zone that you begin to change, grow, and transform.”

— **Roy T. Bennett**
